Lush

OWNER'S MANUAL

THANK YOU

We'd like to thank you for purchasing the Lush plugin. We're proud to stamp our name on this virtual instrument.

Our vision for this plugin was to provide users with a suite of aesthetic sounds. Sounds that add character and emotion.

Lush was designed, produced, & developed in the heart of Austin, TX.

Our sound design team worked long hours in 5th street studios to ensure we put our best foot forward on this pleasing piece of software.

Included is 100 sampled instrument sounds. We designed these sounds in a variety of different ways.

We first started off by recording live instruments that we already had our hands on. These instruments include; Bach Bb Trumpet, Fender 70s Jazz Bass, Wooden Native Flute, Grand Piano, & much more.

We then took these and began layering them. Finally we EQ'ed them to perfection.

HOW TO INSTALL

MAC INSTALLATION

1.) Click on GO in the Mac OSX header.

2.) Hold down the Option key on the keyboard.

3.) Select "Library"

4.) Click on "Audio"

5.) Click on "Plug-ins"

6.) Drag and Drop the AU .component version into the Components folder if you use audio units or Drag and Drop the VST3 in into the VST folder.

7.) Load up your D.A.W and scan for new plug-ins if needed.

MAC OSX PATHWAY: Library > Audio > Plug-ins > Component Or VST Folder

WIN INSTALLATION

1.) Click on Windows start and click on "Computer"

2.) Click on OS(C:) drive, then click "Program Files(x86)"

3.) Select the corresponding Lush VST version which would be either x32 bit or x64 bit.

4.) Select the Lush VST instrument folder and then the Lush .dll file and drag them into your VST folder where your plug-ins are stored.

5.) Load up your D.A.W of choice and scan for plug-ins.
